

Health In Color, Inc.

Creating Digital Learning and Communications Tools across the lifespan for populations of color.

ABOUT HEALTH IN COLOR

Health in Color, Inc. (HNCOLOR) is a convergent and radical research and development lab dedicated to investigating, creating and evaluating digital engagement, learning and communications tools that support cumulative and sustained health and wealth in populations of color. We are at the intersection of TECHNOLOGY and LIFE SATISFACTION for populations of color. Behold, we are doing a new thing and we are doing well in business, while doing good.

What will Order our Steps?

1-WE WILL USE NEW DIGITAL MEDIA TO SUPPORT CHILDREN, YOUTH AND EMERGING ADULTS FROM FAMILIES AND COMMUNITIES OF COLOR IN A POSITIVE TRANSITION TO AND THROUGH ADULTHOOD (LYFE VIRTUALLY©).

2-WE WILL USE MOBILE TECHNOLOGY TO IMPROVE PATIENT-CENTERED CARE THROUGH CULTURALLY-CENTERED PATIENT EDUCATION IN POPULATIONS OF COLOR (BEHEALED VIRTUALLY©).

OUR ENVIRONMENT

Health In Color, Inc. operates in a fully automated microcomputer-based environment that features Apple computers and MAC operating systems. All of Health In Color's personnel are computer literate and have hands-on experience in word processing, database management, spreadsheet, communications, graphics, statistical analysis and/or accounting software applications. Health In Color's telecommunications capability permits direct access to an unlimited number of electronic bulletin boards, archival databases, search engines and game development systems. The company also has access to academic-based search engines and databases through multiple academic partnerships.

In these new and sacred times, we dream and pursue a culturally-intelligent **Colored Meta-Mecca (copyright by Health in Color, Inc)** to house virtual learning, engagement and healing spaces for populations of color. We see a virtual world with over one million children, youth and emerging adults (LYFE Virtually) and a virtual world with over one million patients of color (BEHEALED Virtually). We seek a righteous, creative and passionate team of innovators that radically converge to reach these visions. Over the next decade we will be a major entity in the emerging metaverse with a focus on Populations of Color.

Title Research Partner

Goal(s) To provide scientific expertise on Health in Color's development and evaluation projects to establish the appeal and efficacy of digital products. Partner organizations provide Co-Investigators and supplemental research personnel for projects. Institutions are engaged through subgrants under Health in Color's primary grants.

Health In Color, Inc.

Creating Digital Learning and Communications Tools across the lifespan for populations of color.

POSITION RESPONSIBILITIES

The partner institution may be asked to engage in the following activities:

- 1) Provide a Co-Investigator with an established reputation in the field of focus. The investigator will be allowed support staff in the subgrant budget.
- 2) The investigator will engage with the Health in Color Principal Investigator in support of the study activities including feedback on study design, content development and evaluation activities.
- 3) Support the Health in Color study team with outreach and recruitment of eligible study sites and participants.
- 4) Other related research tasks as negotiated.

REQUIREMENTS

- Must be a leader in the field of focus with Ph.D., MD level investigators.
- Must have access to study sites and study participants that meet the study eligibility criteria.
- Must have a strong record of research funding in the government and/or private sectors.
- Must have a strong track record in the diversity, equity and inclusion of professionals and populations of color in the institution's activities at all organizational levels.
